Yamamasu Masaki	Ando Takatoshi	Health Management Initiatives and Their Effects -Focusing on Local Government Systems and Changes in Business Facilities-	Japan is a super-aging society, and securing the workforce has become one of the issues, so health management has been recommended in recent years. This study focused on the impact of the health management certification system designed by local governments on business facilities in terms of securing human resources and changes in the level of health and examined the effects of the system and its future direction. The results of this study suggest that improving the level of health management certification and implementing PDCA cycle for health promotion initiatives and their results may be important for securing the workforce.
